Programme for your business, email or Freephone 0800 612 6224

For further information about Skills Training UK and how we can create a tailored Apprenticeship training programme for your business, email or Freephone 0800 612 6224.

Eligibility

Below is a summary of the required knowledge, skills and behaviours for a Level 2 NDT Operator:

Knowledge and understanding of:
- In-depth knowledge of one NDT method and an awareness of others.
- The knowledge required for the assessment of defects against acceptance/rejection criteria (referred by standard).
- Relevant sector-specific knowledge (e.g. indications, confidentiality).
- Material and product technology.
- The consequences of false and the risks to life.

Skills and Ability:
- Demonstrate health and safety competences pertinent to the NDT method (i.e. working at heights, in confined spaces or in restricted zones).
- NDT in one method, from the list of methods below:
  - Ultrasonic Testing
  - Radiographic Testing
  - Eddy Current Testing
  - Infrared Thermography Testing
  - Magnetic Particle Testing
  - Penetrant Testing
  - Visual Testing
- Identify and record defects using one NDT method, for example:
  - Revealing defects present on the external surface of components.
  - Using minimum levels of interpretation, usually by visual examination only.
  - Safe operation of the equipment within its capabilities and limitations.

Training in a different class

- Work under technical supervision and to report regularly on progress.
- Demonstrate a disciplined approach relating to industry standard operations and processes.
- Exhibit environmental awareness and undertake safe working practices.
- Have good practical skills, including handling and coordination, in order to apply NDT.

Behaviour

- Communication – communicate effectively with senior NDT staff.
- Teamwork – to work effectively in a team and to support others.
- Delivery – to consistently see things through to timely completion.
- Common sense – to consistently apply knowledge and experience with balance.
- Influence – to have a positive impact without relying on others.
- Ethics – to act with integrity, honesty, integrity and responsibility.

Independent End Point Assessment

To successfully complete the apprenticeship, the learner needs to pass an End Point Assessment. This is an independent assessment which has several stages:

- A Portfolio of Evidence and Achievements – for example, certificates of competence, letters of approval, training attendance certificates, log books of on-the-job training (experience) and employer reports.
- Product Showcase – a presentation of the NDT project to demonstrate that the required knowledge and skills have been achieved.
- Observational Interview – the interview panel will include two people who are knowledgeable in engineering and NDT who are appointed by the independent assessment organisation. The interview will enable the apprentice to demonstrate the knowledge, skills and behaviours demonstrated in the Standard.

Qualifications / NDT Certification

In the NDT Testing Sector, apprentices are required to achieve NDT Level 2 certification in one method in accordance with national and international standards.

This apprenticeship is for an NDT Operator who will usually work as part of an inspection team or department performing NDT inspections to pre-defined NDT Work Instructions and reporting their findings through the employer’s Quality Management System processes. Their findings will be subject to review and authorisation by suitably qualified and experienced supervisory staff, such as NDT Engineering Technicians, to ensure that the results are accurate and reliable.

The skillset and depth of proficiency retained by the NDT Operator, whilst focused on one NDT method, are nevertheless transferable across all engineering sectors.

This apprenticeship will provide resources to meet future engineering requirements, such as, nuclear new build, power generation, transport, oil and gas and defence.

Employer Commitment

An employer must be prepared to provide the learner with the opportunity to carry out work and be part of projects which will enable the learner to produce substantial evidence towards their qualification.

In order to ensure the successful progression of the learner we request that employers participate in part reviews of the learner’s progress at regular intervals throughout the apprenticeship. This ensures continued and positive progress through the apprenticeship. It will also provide the opportunity to discuss and agree how any issues are to be resolved and how additional stretching and challenging activities can be built in.

Duration

The duration of this apprenticeship is typically 15 months and an independent End Point Assessment must be completed at the end in order to pass. See over.

Training and Support from Skills Training UK

Skills Training UK will work with the employer to develop a training plan for the apprentice and our trainer-assessor will visit the apprentice within the work place at least once per month in order to support their learning and development. They will also be supported between visits by off-site information, advice, guidance, academic progress and technical competence support. We will ensure that all learning needs are being met in order to ensure successful progression against all elements of the apprenticeship.
